

## **Department of Diagnostics and Public Health, University of Verona – Verona (UNIVR)**

The mission of the Section of Epidemiology and Medical Statistics (belonging to the Department of Diagnostics and Public Health, University of Verona) is to contribute to the health promotion, to the reduction of the social and individual burden of diseases in human populations and to the evaluation of health interventions.

The Section organizes or actively participates in the implementation of innovative, rigorous and highly standardized national and international multidisciplinary investigations, in order to evaluate the main determinants of human diseases and to identify effective and feasible preventive strategies. In particular, this research activity is carried out in the field of respiratory pathology, gastric cancer, environmental pollution and the identification of genetic determinants of disease. Continuous attention is devoted to the improvement of statistical and epidemiological methods. The Section is intensely committed to contributing to the training of doctors and health personnel in quantitative medicine, epidemiological methodology and methods of evidence-based medicine.
